GIRIDHARAN RAJENDRAN

Principal Engineer · Platform Engineering · AI Agentic Systems · DevSecOps · Cloud-Native Architecture
Everett, WA · 206-637-1716 · mr.giridharan.rajendran@gmail.com · linkedin.com/in/giridharan-rajendran · giridharan-rajendran.github.io

PROFESSIONAL SUMMARY

Hands-on technical architect operating at Principal Engineer level with 20 years designing cloud-native systems, AI-agentic platforms, and DevSecOps pipelines at enterprise scale. Makes independent architectural decisions, sets cross-org technical standards, writes production code. Pioneered T-Mobile's first AI-agentic developer continuous delivery platform — built CDP-MCP Server using Anthropic's Model Context Protocol (MCP) standard, powered by Claude, and deployed on T-Mobile's tag.ai AI gateway — independently designed full system architecture: MCP tool-orchestration layer, RAG pipeline, REST API specifications, and zero trust security boundaries. Impact: $1.2M+ cost savings, 5x deployments, 45% MTTR reduction, 3,100+ compliance hours saved annually.

CORE COMPETENCIES

System Architecture and Design · AI Agentic Systems · Model Context Protocol (MCP) · Generative AI (GenAI) · LLM · RAG · Cloud-Native Architecture · Platform Engineering · Developer Experience (DevEx) · SRE · DevSecOps · IaC · Distributed Systems · Microservices · Event-driven Architecture · REST API Design · Zero Trust Security · High Availability · Kubernetes · Terraform · CI/CD · GitOps · Observability · FinOps · Architecture Review Boards · Engineering Excellence · DORA Metrics · Platform as a Product · OKR-driven Execution · Stakeholder Management · Agile · SAFe

TECHNICAL SKILLS

AI and Agentic: Anthropic MCP, Claude API, LLM, RAG, ChromaDB, vector databases, AI agentic systems, MCP server development, Claude Code integration

Cloud Platforms: AWS (EC2, EKS, S3, IAM, Lambda), Azure (AKS, ADO, Key Vault, Data Explorer), GCP; multi-cloud, cloud-native, high availability

DevSecOps and CI/CD: GitLab CI/CD, Jenkins, CircleCI, ArgoCD, GitOps, SonarQube, SAST/DAST, policy-as-code, zero trust, SOX compliance automation

Containers and IaC: Kubernetes (EKS, AKS), Docker, Helm, Istio, Terraform, Pulumi, Ansible, Python, Golang, FastAPI, Next.js, Backstage.io

Observability and SRE: Grafana, Prometheus, Datadog, Splunk, SLI/SLO/SLA, chaos engineering, blameless postmortems, MTTR reduction

Technical Leadership: Architecture review boards, engineering standards, cross-org influence, technical mentorship, vendor management, OKR execution

PROFESSIONAL EXPERIENCE

Senior Engineer, (Principal-Level IC) — Platform Engineering · **T-Mobile USA** · Oct 2019 – Present

- **CDP Hub — AI-Powered Platform (Flagship Innovation Project):** Independently architected T-Mobile's official Continuous Delivery Platform (CDP) developer portal — unified interface consolidating GitLab CI/CD tooling, platform observability, self-service automation, and organizational intelligence. Core: AI assistant powered by Claude delivering instant answers

from CDP documentation, runbooks, pipeline data, and organizational context; Jira integration; real-time platform monitoring. **Reduced CDP support tickets 65%** and improved customer satisfaction across engineering teams; accelerated software delivery across T-Mobile.

- Built CDP-MCP Server on Anthropic's Model Context Protocol (MCP) — enabling developers to connect via Claude Code, VSCode, or Cursor to invoke 22+ CDP tools autonomously through natural language; deployed on T-Mobile's tag.ai AI gateway. **Enabled engineers to troubleshoot 80%** of CDP platform and pipeline failures through natural language queries.
- **Autobahn Program — Frictionless Developer Onboarding (CDP Single Point of Contact):** Served as CDP's single point of contact for T-Mobile's Autobahn program (expanded scope with TFE integration, formerly Moonshot); delivered AI-integrated CDP Hub and CDP-MCP Server on tag.ai gateway, already serving customers in production. Reduced 23 manual onboarding intakes to a single self-service workflow — cutting app-to-production **time from 2–3 weeks to 60 minutes**. Recognized with T-Mobile's Raise the Bar Award by Director Rob Hansen.
- **CSDM Check — Go CLI for CMDB Compliance (Internal T-Mobile Tool):** Built internal Go CLI tool on ServiceNow's CSDM framework — tracks full MAIA hierarchy (L1 Application Family → L3 SDLC Component → Repository) with real-time SOX, PCI, and USGCI compliance dashboards directly from CMDB data. Improved compliance **audit time by 90%** through continuous automated monitoring.
- **FTE Reporter Access Rollout (4,800+ T-Mobile FTEs):** Executed read-only Reporter access rollout to **4,800+** T-Mobile FTEs on gitlab.com/tmobile — phased controlled batches then automated SAML group link; zero errors, fully automated; new joiners get access on first sign-in, auto-revoked on separation.
- Established technical standards, architecture review boards, and engineering excellence across 40+ agile teams; defined multi-year cloud-native roadmap aligned with enterprise IT strategy and DORA metrics.
- Architected 100+ workload migration to Azure/Kubernetes (Terraform, GitOps) — 85% cost reduction, $1.2M+ annual savings.
- Built GitLab CI/CD with SAST/DAST, SonarQube, policy-as-code — deployment frequency 5x, build reliability +60%, 800+ SOX hours saved annually.
- **SOX CM.02/CM.03 Compliance Automation:** Automated Change and Configuration Management controls across 22 SOX applications — 3,100+ hours saved annually, 100% audit readiness, zero findings.
- Architected observability platform (Grafana, Prometheus, Datadog) — MTTR -45%, outages -30% YoY, 99.9% high availability across mission-critical systems.
- Technical anchor for 12-member Platform Engineering team — defined engineering standards, mentored engineers into senior roles, reduced stakeholder reporting time 75%.

Associate Manager, Software Engineering · **Accenture** · Sep 2010 – Oct 2019

- Directed T-Mobile Rebellion platform modernization — independently designed automation frameworks cutting release cycles 70%; technical standards adopted org-wide.
- Technical lead, 14-person cross-functional DevOps team — Agile/CI/CD adoption, delivery velocity +65%; engineering standards adopted across the organization.
- Automated 90% of manual ops; 99.9% SLA across 52+ apps, 24x7 on-call; monitoring boosted incident response +60%; OKR-driven roadmaps with executive leadership.

Senior Software Engineer · **Alcatel-Lucent** · Oct 2009 – Sep 2010

- Designed Unix/Python automation tooling and REST API integrations; independently architected deployment pipelines reducing manual overhead 30%.

System Engineer · Wipro Technologies (Jan 2008 – Sep 2009) Junior Engineer · LASON India Pvt Ltd (May 2006 – Sep 2007)

AWARDS AND RECOGNITION

- **T-Mobile MVP Award, Q2 2026 —** Recognized for outstanding overall platform impact and customer experience improvement.
- **University of Phoenix President's List, Jan–Jun 2026 —** Highest academic standing in MBA program while working full-time at T-Mobile.
- **University of Phoenix Dean's List —** Exceptional academic achievement in the MBA program.

SPEAKING ENGAGEMENTS

- **Speaker, GitLab Commit (Global DevOps Conference):** Represented T-Mobile presenting "Build Together, Grow Together — Inner Source Templates"; featured by GitLab (1.1M+ followers); 73 engagements, 18 comments from global DevOps community.

EDUCATION

Master of Business Administration (MBA), Graduated with Distinction — University of Phoenix (2026) · President's List, Jan–Jun 2026

Post Graduate Program in Cloud Computing — University of Texas at Austin (2021)

Bachelor of Engineering (B.E.) in Electronics and Communication Engineering — Anna University, India (2005)

CERTIFICATIONS AND TRAINING

AI and Machine Learning

- Generative AI and ML Fundamentals (2025) · Agentic AI (2026) · AI Risk Management (2026) · Databricks Generative AI Fundamentals (2024)
- ML and Supervised Learning — Skillsoft (2025) · AI Ethical Challenges and Risks — Skillsoft (2025)

DevOps, Architecture and Leadership

- GitLab Certified Git Associate (2024) · Red Hat Certified Engineer RHCE · SRE Management (2025) · Certified Technology Architect (2012)
- SAFe 5 Product Owner and Product Manager (2022) · Leadership Development Program (2025)

MBA Badges — University of Phoenix

- Strategic Leadership · Financial Management · Operational Efficiency
